I am a motivated individual with extensive experience and knowledge in high value and complex industrial construction projects. I pride myself on personal continuous efforts to improve sustainability and efficiency, reduce cost and emissions all whilst maintaining high health and safety standards.

Career

Parr Projects – Project Manager *(December 2022 – Current)*
A great opportunity came forward to work at Parr Projects, a small principal-contractors that offers a full spectrum of construction expertise. I am currently the main point of contact for Parr Projects, leading pre-construction developments to post-construction final account. The projects differ to my typical £multi-million undertakings however not without their difficulties. I have utilised my expertise in all areas of construction, derived from the large jobs and put into practice with current requirements including new build, fit-out programmes and a complete range of facilities management solutions incorporating M&E, fire safety services, civils works and renewable energy systems. Current jobs include:

- Full office and M&E refurbishment of NHS buildings (Stella House and Hesketh House). 14 week programme, Circa £1.4M total.
- Decarbonisation works to various location across the Tameside, Trafford, and Bolton council. 11 week total programme, £Various.
- Lidl DRS scheme in 11nr. locations across the UK. ~£150,000 and 6 week programme per store.

McLaren Construction – Snr. Site Manager *(July 2022 – December 2022)*
I took a step backwards from PM to SSM to join McLaren Construction as they offered me the opportunity to work in the North-west region only rather than travelling. My role and responsibilities didn't change from when I was project managing at TSL projects as I continued to be the main point of contact for internal and external stakeholders. My main responsibilities include:

- Maintaining high HSQE standards, introducing new systems and ideas from past experiences.
- Programming and reprogramming areas of the works to fall in line with client deadlines.
- Sub-contractor pre-start meetings, liaison, and quality checks throughout.
- Client and developer liaison, having to correct issues with certain s278 works and HV legals.
- Introducing new standards with regards to quality of design, procurement, workmanship. Upon arrival the site was vastly falling behind with said standards resulting in low HSQE scores, we quickly turned this around and achieved consecutive 'contractor of the month' for 3nr. months.
- Achieved a snag free PC from being 5-6 weeks behind programme when initially joining.

Projects mentioned above:

- Deeside Industrial Park, Client: Workman – 40 week programme for 2nr. base build sheds (total 9,500sq/m). Circa £10M.

TSL Projects – Project Manager *(June 2021 – July 2022)*
My main responsibility as a Project Manager is to deliver a high-quality product in line with client and company expectations alongside hitting key milestones within the project's programme. I have managed fast-paced, large-scale sheds and delivered on budget, on time and at an exceptional standard. Other key responsibilities include:

- Implementing and maintaining company HSQE procedures and quality assurance methods.
- Main point of contact for internal and external stakeholders, including clients, sub-contractors, and suppliers with up to 150 people on site at a time.
- Overseeing, updating, and presenting the project's weekly status report with clients and directors.
- Manage budgets and financial status of projects exceeding £32M with both internal and external Quantity Surveyors.
- Responsible for ensuring all method statements and weekly critical activities are adhered to by the wider team.
- Leading design and contractor team meetings, pre-construction to post-construction.
- Applying construction knowledge to enforce preferred methods, quality and company values.
- Creating and developing construction programmes and correlating weekly critical activities, blue beams, and labour histograms.
- Having key communication throughout a projects lifespan across all parties involved.
- Problem solving in a timely and efficient manner to ensure the projects stick to the tight schedules regardless of impacting variables.

Projects led include:

- Amazon Bracknell Distribution Centre – 21 week programme - 8000sq/m shed with 2,500sq/m office mezzanine and plant deck, and a 9,800sq/m 4-storey van park. Full gas mitigation for below ground services, and superstructure. Circa £32M.
- Amazon Norwich – 12 week programme - 30,000sq/m full EV integrated van park. Circa £4M.

TSL Projects – Site Manager *(September 2020 –June 2021)*
Key accountabilities as Site Manager included maintaining the integration of sub-contractors on site to provide a coordinated, fast-paced, and safe working environment.

- Ensuring site HSQE, quality and legislative records are up to date and cross-correlating sub-contractors RAMS with actual works on site.
- To foresee, highlight and escalate any potential issues that may arise and apply my knowledge in the different aspects of construction

(civil, structural, design) to aid in the construction processes for the most efficient, effective and safe working methods and practices.
- Building strong relations with sub-contractors as their main point of contact when arising issues occur.
- Dealing with supply chain to ensure effective organisation of materials and control over site.

Projects managed include:
- Amazon Hull Distribution Centre – 24 week programme – 10,000sq/m shed with 3,000sq/m office mezzanine full fit-out and a 7,500sq/m 3-level multi-storey van park. Circa £28M.
- Amazon Gateshead Distribution Centre - 20 week programme – 9,600sq/m shed with 2,500sq/m office mezzanine fit-out and 750 space van-park with full EV infrastructure. Circa £22M.
- Amazon Belfast Distribution Centre – 19 week programme – 7,600sq/m shed with 3-level multi-storey van park. Circa £19M

TSL Projects – Project Coordinator *(June 2020 – September 2020)*
As project coordinator I ensured full document control and led the BREEAM assessment for projects across Northern Ireland and Ireland. Other responsibilities included:
- Overseeing the Considerate Construction Scheme.
- Compiling all Practical Completion documentation and certification for an efficient handover process.
- Although Project Coordinator was my official title, I also took further responsibility as:
    - The lead on sub-contractors' packages.
    - The main point of contact for internal fit-out and M&E install, managing their supply chain, working areas and processes to hit programme targets in a safe manner.

Self-Employed – Curtain Wall Installation (*July 2019 – June 2020)*
Upon returning from travelling, I decided to pursue a career in the construction industry following prior experience and a keen interest in the sector. Upon consideration, I chose to specify in Curtain Walling and received my level 2 NVQ.
- Internal fit out and installation of specialised bomb-blast cladding under the sub-contractor Micam LTD at T2 Manchester Airport.
- Installation of specialised bomb-blast STO glass panels for internal land-side elevations.
- Managed the erection of a multi-purpose 900sq/m prayer room at Luton Airport by installing custom bomb-blast glazing.
- Fixer and installer of the curtain wall exterior of office buildings using Technal Systems at Birtchwood Business Park

Stein IAS - Global Accounts Manager (*May 2017 – November 2018)*
I joined as an Accounts Manager after graduating. My personal client coverage focussed on B2B marketing across various demographics and market sectors. Key responsibilities included:
- Constructed and developed multiple award-winning campaign strategies specific to client requirements through collaborating with specialist internal teams on a global scale. This included working closely with developers, designers, and content teams.
- Analysed campaign performance by reporting on KPIs and other relevant statistics, providing insight to support data-driven decision-making during campaigns and to adhere to market fluctuations.
- Personal client liaison across several regions including UK, France, USA, and China, exposing myself to diverse accounts.
- Led regular face-to-face and online meetings with clients and other operational teams.
- Integrated as part of a UK team that collectively generated revenue in the excess of £14M per annum and collaborated with teams in USA (New York & San Francisco), France and China.
- Managed six-figure commercials for multiple clients across various currencies.
- Contributed to new-business pitches from research to presenting to potential clients.
