January 2001 Debenhams Basingstoke (7.5million fit out of new shell)
March 2002 Debenahams Canterbury (3.5million refit of trading store)
November 2002 Debenhams Bullring (£16.5million fit out of new shell)
September 2002-2004 JJB Sports Burton/Kidderminster

Date **June 2004-September 2012**
Employer **Metnor Construction Limited**
Position **Commercial Manager**

I Joined Metnor following an approach by them to become Commercial Manager of the new construction arm of the PLC. I overhauled all existing commercial systems including the transitional period when the existing commercial staff left, appointing and recruiting a whole new department. In three years, turnover grew, from £15 million to £35 million, with the following year's order book reaching £45 million. Within this turnover we have carried out many exciting and complex projects including Harlequins RFC, embracing a whole range of procurement routes. I am responsible for all commercial activities including management of staff, presentation of board reports, and negotiating all contract terms with clients. I am very comfortable and knowledgeable on all JCT forms of contract and am happy negotiating standard contract terms. I have the ultimate responsibility in all legal tactics pertinent to construction operations. Our company has recently specialised in health care provision, prestigious hotel new build and fit out, including Mal Maison, De Vere and Hotel Du Vin, and extensive leisure experience. We have also recently completed a complicated civils package of works to strengthen an existing retaining wall for Network rail at the manors track in Newcastle upon Tyne. More recently we have begun a £15,000,00.00, 400 bed student accommodation project for Northumbria University in the centre of Newcastle, and we have recently completed phase 1 of a £40 million contract to build modular "first generation data centres" for a London based multi -national data centre provider. We have progressed to a framework agreement with our Data Centre Client and have provided 6000m2 of data hall for them to date with commitment to a further 10,000m2, and I am responsible for all pricing, procurement and cost control operations.

The Commercial management of the Datacentre framework involved all pre construction work to set target cost budgets based upon previous agreed final accounts, including advising on the best procurement methods for the supply chain, whether that be single stage tender, 2 stage tender or target cost.

The final account process involved a full audit of our costs and the supply chains costs and I led that process for Metnor in conjunction with the Clients Commercial team.

I have an in-depth knowledge of all forms of commonly used contracts and have been responsible for the direct negotiation of these since I became Commercial Director and through to the CEO position.

I have overseen the recent forced restructure of the company due to the prevailing financial climate, implementing some extremely difficult strategic decisions for the good of the company, including taking over the management of the Estimating department and integrating it into the commercial department, culminating in us breaking even in 2009, despite a complete lack of private sector investment, and am pleased to say that we are already showing significant profits for 2010, and we are now happy to say that 2011 has been our most profitable ever year.

Date: **September 2012-May 2015**
Employer: **Metnor Construction Limited**
Position: **Commercial Director**

In August 2012 I was approached by the Board Directors of my existing Employer to take up a position of Company Commercial Director. The role involved extending my influence on the other Group Companies, including Norstead our M&E division, to pass on my Commercial knowledge to improve their performance in this area, as well as maintaining full Commercial responsibility for our Construction Division. Part of the role involves the handover from our existing Managing Director to me upon his retirement, with a large emphasis on strategy

planning, and nurturing new and existing Client relationships. During this time, I have also overseen the rebranding of the Company complete with new website and organisational structure to cope with the increasing amount of Data Centre specialist projects we are being awarded, as well as more Traditional Type Construction Projects.

Date: **May 2015-May 2019**
Employer: **Metnor Construction Limited**
Position: **Managing Director**

In May 2019 I accepted the position of Managing Director of Metnor Construction. My main goal was to drive to profitably grow the company which we did increasing turnover from £23-£50M plus within year one. I targeted larger more profitable projects in the South competing against Tier one Contractors as I knew there would be more margin. My proudest achievement was convincing potential Clients of our ability to deliver these projects culminating in a shell and core new build for a data centre in Canary wharf, which we delivered very profitably, on time and on budget. We then won three new build leisure centres from tier one contractors. During this time, I oversaw a rebrand of Metnor Construction, and won back our COLT data centre client building insitu data centres for them in Welwyn Garden City.

Date: **May 2019 – May 2023**
Employer: **Metnor Group Limited**
Position **CEO**

In May 2019 I was asked to take over as the CEO of the Metnor Group of companies. The role involved me heading up our three main trading divisions including Metnor Construction Limited, Norstead and Metnor Great Yarmouth. I was tasked with growing the Business, bringing Norstead into the delivery of Metnor Construction and establishing a structure to allow the growth to continue into profitable and recession proof sectors, which we did with Leisure, Healthcare and PRS schemes for some leading blue-chip organisations. During this time, I found I had an aptitude for Business Development relying on my technical skills to convince new Clients of our ability to carry out the larger projects.

Date: **May 2023 – Present**
Employer: **John Sisk & Son Limited**
Position: **Regional Director**

I joined Sisk as a Regional Director for UKNorth, with a view to gain traction in their “breaking new ground” strategy specifically within the fit out and refurbishment sector. We have made some significant inroads in terms of great opportunities and tenders, but Sisk are finding the transition from huge projects to smaller fast track projects difficult in terms of governance. I am based in Ireland and travel there and back most weeks to assist in the fit out of their new office in City West Dublin.

Previous Experience:
During my circa 30 years in the construction industry, I have been involved with all aspects of Quantity Surveying, Estimating, project management, Contract Administration and Commercial Management.

I particularly enjoy the commercial aspects of my role and have a reputation for maximising margin, in conjunction with giving our client’s the professional service they demand. I have been flexible and have undertaken projects varying in size from £300k to £50million. I have picked up some vital contractual experience along the way. Although I believe that a good project delivers without the need to resort to the contract, I have the skills and experience to deal with any given situation. I have nurtured some good contacts throughout my years in the industry and believe I have a good reputation within my field.

I have worked extremely hard to gain both the academic and the practical status I have achieved and am very confident in my own ability to improve any organisation with my fresh and uncompromising approach. I am loyal, conscientious and hard working and have consistently achieved the best commercial results within my organisation.

Personal Interests

I enjoy spending time with my family and three children, travelling and meeting people and get many opportunities to visit new places. I enjoy sports especially football and tennis, and I am a member and regular user of a gym. I also enjoy walking, reading and relaxing in my time off.
