PROFIL

Senior quantity surveyor and outstanding performer with over 20 years' experience in EPC project management, quantity surveyor, procurement & contract management within data center, pharmaceutical, oil & gas, WTP, pipeline, etc. Proven success in leadership, operational excellence, and organizational development with keen understanding of elements of construction and commercial. Recognized for inspiring management team members to excel and encouraging creative work environments.

Key Skills

Project management, procurement and tender handling, contract processing in German & English according to FIDIC, VOB, etc., budgeting and cost management, checking and evaluating the monthly payment applications related to the progresses and issuing payment cert for subcontractors, reviewing the invoices of suppliers, managing and control of all variations and issuing the site instructions, good coordination and communication with the teams as well as subbies, good negotiator with client and subbies, cost control and estimation, validation, evaluation, adherence to schedule, reporting and analysis, high knowledge of projects both technically and commercially.

WORK HISTORY

Contracts / Change Manager: ***04-2023 – today*** **- Freelance** — ***Germany – Leipzig & Frankfurt***
German Aerospace Center — ***Griesemann Groupe***

- Review of contracts and compliance with physical and financial progress.
- Monitor and control the progress and change orders.
- Ensure adherence to contract program/schedule and provide monthly reports on planned and actual progress via the ERP/ABAS system.
- Control and reporting of actual progress and forecast in accordance with plan and budget.
- Allocate the monthly hourly budget to the internal and external engineering team, control and ensure compliance with the relevant qualifications through the IBL.

Senior Quantity Surveyor: ***10-2022 – 02-2023*** **- Freelance** — ***Germany - Frankfurt am Main***
Data Centre EQX – FR13 — ***Mercury Engineering***

- Reviewing of Contracts and ensuring compliance.
- Procurement – operational procurement activity and contract support, in conjunction with the Procurement Department.
- Managing and forecasting the Cash flow of both projects and the business.
- Reviewing and commercial management of all projects, to ensure accurate and reliable reporting.
- Identify, analyze, and report on trends within Business & Projects.
- Provide Data and analysis of issues & risks as required by Management.
- Improve and implement best practice commercial processes and accurate budgeting,
- Ensure compliance with Contract Program/Schedule and provide weekly reports to construction team on planned versus actual progress.

- Review all incoming correspondence from Employers, Design Team and /or subcontractors, to identify contractually critical items and to initiate replies.
- To ensure the Construction Team is adhering to all Contractual Requirements and providing advice and monitoring of same.
- Ensure reporting is in line with Group Policies & highlight exceptions to Management.
- Reporting directly to Lead Commercial Manager & General Manager
- All other duties are associated with this role.

Quantity Surveyor: ***03-2022 – 10-2022*** ***Germany - Frankfurt am Main***
Data Centre EQX – FR11 ***Winthrop Engineering and Contracting Limited***

- Supervise the procurement of packages ensuring technical completion.
- Monitor sub-contractor and supplier payments and sub-contractor variations.
- Manage the project budget as directed by the Project Director
- Manage relevant client communications.
- Document and cost changes to the work scopes and prepare the monthly valuations and final accounts.

Mechanical Quantity Surveyor: ***09.2021 – 02.2022 -*** **Freelance** ***Germany - Frankfurt am Main***
MIB Bio2020 Sanofi ***Exyte Central Europa GmbH***

- Keeping an auditable record of all site's administrative documents for the assigned work package contracts or purchase orders.
- Reviewing Work Contractors' submitted accounting versus issued construction documentation (AFC or As Built) and the correct application of the contractual agreements.
- Obtain Construction Team endorsement on installed quantities and/or progress claimed by work contractors' submitted accounting; directly execute spot site verifications on the above.
- Document any variation in the work making sure that the relevant Field Instruction has been raised.
- Expedite work contractors for variations' cost estimation or, whenever possible, provide an estimation on my own.
- Scrutinize labor, material, and equipment costs, as well as contracts to ensure the best deals in changes.
- Obtain formal authorization to proceed with variations (Field Instructions) and distribute them to the stakeholders (work contractor, construction team, Client, etc.) subsequently.
- Along with the construction team regularly verifying Fiend Instructions completion, formalizing relevant documents, and informing work contractors subsequently.
- Review correctness of contractors submitted Monthly Progress Payment Certificate (PPC)
- Advise Subcontract Administrator on readiness for invoicing authorization of contractors submitted Monthly Progress Payment Certificate (PPC)
- Along with the Subcontract Administrator, actively contribute to the preparation of the monthly Project Administration Report and other administrative documents as required.
- Cooperate with the Home Office Subcontracting Department in procuring or agreeing on the services of work contractors and/or subcontractors who work on the construction of the project.
- Liaise with Client, Construction Team, and Work contractors, and/or their Subcontractors.
- Keep informed Subcontract Management of any issue with the work contractors' accountancy.
- Establish and maintain professional relationships with external and internal stakeholders.

Founding and Training: ***01.07.2020 – 31.08.2021***

- Founding my freelance regarding to planning and participating in seminar by IHK Prenzlauer - Brandenburg
- Upgrading my skills by training the programs and software of the project.

Project Quantity Surveyor – Project Controller: ***02.2019 – 06.2020*** ***Germany - Brandenburg***
EUGAL Project – (North Stream 1&2 - Lot 5&6) ***Sicim S.p.A. (Italian Co.)***

- Collecting data from Work Supervisors/Foreman ensuring that the right Progress information is shared inside the Project Team.
- Preparation of the monthly payment applications from BOQ (Collecting productions of work and Documentation/Evidence of work performed).
- Preparation of Other Reports on Site (Including but not limited to Production Profile, Hydro testing Follow Up reports, Progress Slides for Weekly & Monthly Meeting Presentation).
- Preparation of Work Schedules & Progress Updates.
- Analysis and Economical evaluation of tracked Events and Extra Works, which generate Change Orders or Claims.
- Preparation of Tracking Data Bases collecting info about Jumps, Disruptions, and events, which may generate a Change Order.
- Preparation of Status Reports as required by the Project (Daily/Weekly/Monthly).

Training and reorientation in Germany: ***10.2015 – 01.2019*** ***Germany – Bremen***
Professional reorientation in Germany with the aim of positioning in engineering sector

- 09.2015: Moving to Germany
- Recognition of foreign academic degree in Germany in August 2018 (application: March 2017)
- 12.2015 - 04.2016: language course
- 01.2018 - 02.2018: four-week training: Project management - GPM - at Alfatraining
- 04.2018 - 09.2018: language course B2 at bfw
- 11.2018 – 01.2019: coaching at IBB for planning the professional target

Quantity Surveyor – Project Controller: ***08.2013 - 09.2015*** ***Iraq - Sulaymaniyah and Halabja***
Water Treatment Plant and Pipelines ***SsangYong (south Korean Co.)***

- Review Project's technical documentation and requirements for Water Treatment Plant (WTP), Pipeline, Valve Chambers, connections, and fiber-optic line for cities Sulaymaniyah and Halabja in north of Iraq, (international project)
- Design, execution and cost estimation for all variations and client orders.
- Prepare the design and FCRs for the pipeline and valve chambers and interface with the relative process, structures, and installation.
- Prepare the technical specifications and datasheets for all field changes.
- Review and assessment monthly applications received from subbies as per measurements.
- Assist with the selection of laying spread/methods and perform/review installation design analysis for the pipeline system.
- A chief negotiator with international subcontractors and suppliers.
- Oversee the quotes, bid evaluation and procurements phases.
- Assist the pipeline lead or the project engineering consultant in solving technical problems arising during project development and for interfacing/supporting the design and procurement department.
- Perform/verify all discipline analyses and calculation notes required to design the pipelines system, including the engineering activities of third parties/sub-contractors.
- Provide the order list as per the material measurement from the drawings and update them according to the variations.

Quantity Surveyor & Mechanical Lead Manager: ***01.2013 - 08.2013*** ***Iraq – Soran***
University dormitory buildings ***Australian First Construction Group (Australian Co.)***

- EPC - detailed planning and controlling, redesign of wastewater treatment plants package for university dormitory buildings.
- Supervision of Construction and inspection the mechanical installations.
- Bill of quantities and cost estimation and updating them during the construction
- Reviewing the technical documents and Plan tests to general conformity and compliance with building regulations legal basis documents

- Solving problems that arise during install and review documents submitted by the mechanical subcontractors to ensure that the materials that will be installed are correct, attend meetings related to the construction project and go on site walks to ensure the project is being built properly.

Project Manager - Coordinator: ***07.2011 - 01.2013*** ***Iraq – Rawanduz***
Water Supply Improvement ***Payam Omran Mahabad (Iranian Co.)***

- Provide technical design on Pipeline, Pump Station and Water Storages project and technical support to the team.
- Manage project and tasks and work with area clients on project related to Pipeline, Pump Station and Water Storages and related facilities.
- Lead preparation of design calculations and analysis
- Coordinate project schedule and budget so project finish in a timely manner and within budget.
- Supervise project team, support staff and coordinate with other disciplines for execution of the project.
- Prepare and oversee detailed construction document packages (plans and specifications) and all deliverables for client.
- Perform other duties as assigned.
- Being active in the Pipeline, Pump Station industry, keeping abreast of emerging technologies, research and development opportunities, and conference/committee participation in professional societies

Quantity Surveyor, Project Engineer and Project Manager: ***09.2002 - 07.2011*** ***Iran***
WTP, Gas & Water pipeline, mechanical installation ***at Water and Gas construction companies***

- Project engineering and planning, coordinating, design, troubleshooting, and clash removal in all departments
- Provide complete engineering expertise as well as technical support to manufacturing management pertinent to pumping stations, plants, water treatment plants, pipelines, and treating and building mechanical installation processing and measurement facilities.
- Provide primary selection, sizing along with layout of projected new or expanded facilities.
- Develop engineering designs and diagrams related to projects.
- Prepare maps for pipelines, processing, dehydration, compression, and treating facilities along with meter stations and various gas facilities.
- Engineering and control of safety rules and duties
- Objectives according to Standards and Documents
- Prepare project scopes, AFEs, cost estimates, and proposals for all new projects, equipment sizing, modifications, and related parameters.
- Manage specific projects as required inclusive of direct supervision for construction activities and management of all contract inspectors.
- Develop, administer, and supervise project budgets along with schedules.
- Head responsibility to complete activities pertinent to project risk analysis, evaluation, remediation, and integration of data.
- Identify repair, analyze mitigation actions effectiveness.
- Perform as single point contact amongst respective area and PD/PTSD Safety Engineer.
- Recommend solutions for further study along with report changes.
- Mechanical engineer for Pumping stations, water treatment plant, powerhouses, transmission Pipelines, and distribution (Ductile, Steel, and Polyethylene pipes) networks.
- Prepare the technical specifications and datasheets for material purchasing.

EDUCATION

09/1996 – 08/2002	Faculty of industrial science and engineering of Urmia University, Urmia (Iran) Study Mechanical Engineer in Thermofluids Degree Bachelor of Science
09/1981– 06/1995	Shahrikandi Gymnasium, Mahabad (Iran) Field of study Mathematic and Physic

FURTHER EDUCATION

01/2018 - 02/2018	Project Management Alfatraining, Bremen (Deutschland)
08/2019 - 08/2019	Project Scheduling in Time-Location-Chart with TILOS Version 10 Office of Sicim S.p.A – Angermünde (Deutschland)

SKILLS

- Operating Systems MS Windows
- Software SAP ERP, ABAS ERP, SAP-Ariba, MS-Office, BIM Modeling, AutoCAD, TILOS, Microsoft Project

LANGUAGE SKILLS

- English Fluent in Writing & Speaking
- German Fluent in Writing & Speaking
- Kurdish Native
- Farsi Native
- Turkish & Arabic Basic
