AM2 Electrical Installation

Knowledgeable Electrical Supervisor experienced in electrical installations, testing and inspections. Promotes technical excellence to achieve outstanding quality and safety standards. Methodical and meticulous for accurate task completion in pressured conditions.

EXPERIENCE

April 2024 - Current
MEP Manager ***Morgan Sindall***, Plymouth , Devon
- Reviewed ongoing work on a daily basis to ensure quality
- Reviewed and commented on sub contractor RAMs submittals
- Liased with customer to ensure customer satisfaction during project
- Collaborated with quality assurance teams to establish quality control procedures for MEP installations and operations.
- Coordinated with architects and construction managers to integrate mechanical, electrical, and plumbing systems into overall building designs.
- Reviewed and approved technical drawings, specifications, and documents for accuracy and compliance.
- Developed risk management strategies to mitigate potential project delays and cost overruns.
- Oversaw commissioning of building systems, verifying that installations met project specifications and performance expectations.
- Analysed energy consumption data to recommend solutions for reducing carbon footprint and utility costs.
- Prepared detailed progress reports, keeping stakeholders informed about project status and milestones.

September 2023 - April 2024
Electrical Inspector ***Guardian Electrical Compliance*** , Plymouth, Devon
- Obtained proper permits to carry out electrical work on facility and construction projects.
- Enforced safety regulations and penalised workers for not following work safety agreements.
- Meticulously tested installations to check continuity of circuits and compatibility and safety of components using test equipment such as multimeter
- Managed electrical construction safety by carrying out weekly safety checks and toolbox talks in line with company procedures.

January 2023 - September 2023
Electricain - Test and Inspection ***Bylor JV - Hinkley Point C***, Bridgwater, Somerset, Somerset
- Test and inspecting on Europe's biggest construction site
- Updated team on project changes, progress and developments.
- Meticulously tested installations to check continuity of circuits and compatibility and safety of components using test equipment.
- Obtained proper permits to carry out electrical work on facility and construction projects.
- Provided electronic reporting for completed installation works, detailing labour hours and materials used for accurate records.

FOCUS Training , Plymouth, Devon, Devon

IET 18th Edition
Focus Training , Plymouth, Devon, Devon

Compex 01-04
CP engineering

- Motivated hard-working staff and contractors to deliver faultless results against construction deadlines.
- Managed electrical construction safety by carrying out weekly safety checks and toolbox talks in line with company procedures.
- Independently troubleshot electrical issues using test equipment
- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.
- Tested entire electrical systems to assess performance levels and monitor safety concerns.

February 2022 - January 2023
Electrician - Devonport Royal Dockyard ***Babcock International***, Plymouth, Devon, Devon

- Performed electrical utility services for industrial-based and new building projects.
- Installed emergency lighting, uninterruptible power systems and battery systems.
- Tested entire electrical assembly to assess performance levels and monitor safety concerns.
- Adhered to health and safety guidelines throughout jobs by conducting risk assessments, monitoring surroundings, following procedures and utilising PPE.
- Completed electrical work, including maintenance, installation and repairs within budgets.
- Directed electricians on installation, maintenance and repair on electrical wiring and equipment.
- Kept the safety of the people and environment at the top of priorities throughout all nuclear development projects.

August 2021 - February 2022
Electrician - Devonport Royal Dockyard ***WH Scott engineers - SRC Babcock***, Plymouth, Devon

- Installed conduit, wire and motor controls.
- Evaluated electrical systems, equipment and components to identify and resolve defects and safety risks.
- Adhered to health and safety guidelines throughout jobs by conducting risk assessments, monitoring surroundings, following procedures and utilising PPE.
- Completed electrical work, including maintenance, installation and repairs within budgets.
- Conducted routine maintenance and testing on commercial and domestic electrical systems, ensuring systems worked safely and within electrical guidelines.
- Independently troubleshot electrical issues using digital multimeters and battery analysers.
- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.

November 2020 - April 2021
Electrician ***Self Employed*** , Plymouth, Devon, Devon

- During this time I contracted to many different places to carry out a variety of domestic, commercial, industrial works, in both installation and testing roles
- I spent this time in Qatar and Dubai, running a team of electricians as we test and inspecting government buildings
- Wrote electrical installation condition reports, minor works certificates and short form risk assessments to inform future decision-making.
- Assessed electrical systems, circuit continuity and accessory fixtures with various testing equipment.
- Built and installed control panels operating electrical systems in buildings, protecting electrical, instrumentation and control devices.

- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.

August 2017 - August 2019
Electrical Fitter - Devonport Royal Dockyard ***Morsons International***, Plymouth, Devon, Devon

- I was working in Devonport Dockyard through Babcock international to support refurbishment and planned maintenance of many different types of Navy vessels
- I also help with 'shore supply' which is providing dockside power to enable the diesel generators to be switched of while the relevant boats are docked.
- Read and interpreted specifications, diagrams and blueprints to understand and apply requirements for projects.
- Used PPE and established fall protection to maintain safety procedures and apply protective measures.
- Managed movement of materials and equipment to different job sites to facilitate work orders.
- Oversaw apprentices, answered questions and provided feedback on work to assess performance and abilities and maintain quality standards.
- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.
- Conducted routine maintenance and testing on commercial and domestic electrical systems, ensuring systems worked safely and within electrical guidelines.

November 2013 - August 2017
Electrical Apprentice ***Wright and Owen Electrical Contractors***, Plymouth

August 2009 - December 2013
Electricians Mate ***Abacus Loft Conversions***, Plymouth, Devon, Devon
