Copenhagen, Denmark
Mobile: Saudi Arabia: 00966598324476
Mobile: Denmark: 0045-30959499
Nationality: Danish

Education

B.Sc. Civil Engineering, University of Mosul College of Engineering, Mosul, Iraq: 1980-1986
M.Sc. Civil Engineering & Environmental, Technical University of Denmark, DTU, Lyngby, Denmark: 1997- 999
B.Sc. Information Technology, Technical University of Denmark, DTU, Ballerup, Denmark: 2000-2002

Professional Affiliations

PRINCE2, (PRojects IN Controlled Environments), Mannaz, Copenhagen, Denmark, 2012
EUR ING Certificate of Award of the Designation of European Engineer (PE), 2002
IDA, Association of Danish Engineers, 1999
Iraqi Engineers Union, Professional Engineer (PE), 1989

Profile

Samer is a highly experienced professional with over 30 years of experience in the fields of Project planning & control and risk management. He is conversant with all aspects of project planning and control, including scheduling & progress monitoring, cost estimation & control, risk management, change management, document control systems, claims assessment, EOT, and reporting. He has held the positions of Project Manager, Project Planning & Control Manager, Risk Manager, Chief Planner, and Project Controls Director. Having extensive planning experience in developing time schedules for high-complexity infrastructure projects covering high-speed Rail, Metro, Roads, Highways, Tunnels, E&M, O&G, Complex Buildings, high-rise buildings, Huge Factories, and IT projects, with project values in the region of multi-billion dollars in Denmark and the Middle East (Iraq, Qatar, and Saudi Arabia).

His success in his career has not been only due to his technical strength in the field but also to his knowledge of construction technology and his background as a civil engineer. Moreover, this has been reinforced by his strong communication in liaising with all stakeholders, including Clients, PMO, designers, subcontractors, suppliers, local authorities, and other stakeholders. He provided project cost information and monitored the budget and risk. He developed the planning guidelines & processes for directing projects, implemented & managed the tools & methodologies, and developed the steering indicators (KPIs). Over two decades, while working in Copenhagen (Denmark), Samer was a key member of specialist consulting teams that provided advice to various local authorities on numerous projects.

Samer has the responsibility to lead, develop, manage, and execute all phases of project control (planning, scheduling, cost, and risk analysis). In doing so, he has utilized his expanded knowledge with project control and extensive experience in various types of projects and Clients.

Technical Qualifications

- Leadership on project planning and scheduling, risk management, cost estimating, cost control, progress measurement, document management, and reporting for the entire project throughout its lifecycle.
- Project Planning and time scheduling using the Critical Path Method (CPM), Work Breakdown Structure (WBS), Earned Value Management (EVM), and Cost Estimating (Budget and estimates).
- Expert proficiency in Primavera P6 (PPM and EPPM) & Expert proficiency in Time Location Diagram (TILOS).
- Ensuring compliance with the project management procedures and processes.
- Providing support to project teams in the identification, assessment, and management of risks during all project phases.
- Expert proficiency in quantitative risk assessment using Monte Carlo simulation (utilizing Primavera Risk Analysis, Ram-Risk, Predict, and Safran).
- FIDIC procedures for Time for Completion, payments, and claims.
- Delay Analysis: providing delay impact analysis to substantiate additional time and the effect of compensation events.
- Familiar with document management systems such as Aconex, ThinkProject, Relatics, SharePoint, etc.
- Identify and recommend Key Performance Indicators (KPIs) that are suitable for different projects and initiatives while managing a balanced measurement system for improvement.

Work Experience

- **JASARA Program Management Company consultancy**
  Riyadh /Saudi Aribia from Sep 2022 to date
  Project Controls Director

  JASARA PMC is the joint venture between the Saudi Public Investment Fund (PIF), Jacobs, and Saudi Aramco established to elevate the delivery of Infrastructure programs in Saudi Arabia. JASARA is tasked with designing and planning a tourist project in Al Ulla valued at around US$ 5 billion. Eight high-rise skyscrapers, amusement parks, a golf course, and a large utility plant are all included in the program.

Responsibilities:

- Responsible for all aspects of project planning & control, risk management, cost management, and document controls.
- Based on the Contract, establish & implement the planning, risk, & document control tools, and set the project planning methodologies, procedures, and guidelines.
- Lead the planning team, in close contact with the Client & consultants, to produce the WBS & deliverables list, and then establish the project contractual baselines based on the Contractual requirements, capturing the entire scope, to track progress & report to the client.
- As PMC, present the Client, chair the progress weekly meetings with Consultants and Contractors, and suggest Programme recovery mitigation measures.
- Lead & support the risk manager's effort to create the Program risk register based on the contractual requirements and follow up on the mitigation actions.
- Lead the alignment and communication with the procurement team on tendering and contract variations.

- **Femern A/S**
  Copenhagen /Denmark from Feb 2020 to Sep 2022
  Head of Project Controls, Chief Planner & **Schedule Risk Manager**

  Femern A/S is tasked with designing and planning a fixed link between Denmark and Germany across the Fehmarnbelt. It will be an 18-kilometer-long immersed tunnel and the world's longest of its type for both road and rail. The project will be the biggest construction project in Northern Europe up to 2030, valued at around US$ 9 billion.

Responsibilities:

- Lead the Femern planning team to develop & manage all phases of the project. This effort includes planning, scheduling, risk assessment, cost analysis, progress measurement, and reporting.
- Follow up on the progress of Fehmarnbelt Construction to ensure that the project is on track to open the Fehmarnbelt as planned.
- Provide the project planning team with planning procedures, guidelines, direction, and specialized planning assistance.
- Lead follow-up with the monthly progress on the contractor Programme & Client internal activities, and then reflect this progress on Femern's internal Master Project Programme.
- Lead in developing a monthly progress report to the executive management, including Femern internal Programme (Approvals, Procurement Processes, Early works, HSE, Emergency response plans, marine-related activities, and the Tolling system).
- Guide and assist in reviewing, commenting on, and approving the Contractors: baseline Programme, revised Programme, monthly progress, planning procedures, EOT, and claims.
- Introduce a new tool for quantitative schedule risk assessment and manage risk change control plans across the project.
- Identifying schedule risks, opportunities, and relevant mitigations and reporting the outcome to the executive management
- Lead the alignment with the sustainability departments.

- **WSP**
  Copenhagen /Denmark from Dec 2014 to Jan 2020
  Project Controls Manager: Planning and Risk Manager

The Project is a total renewal of all signalling on the Danish rail network, valued at around US$ 3 billion.

Responsibilities:

Responsible for all aspects of project planning, progress monitoring, and reporting. This includes facilitating and leading the Thales-Strukton teams to produce and report progress on detailed sub-schedules (e.g., software development, engineering, safety approvals, installation, testing, migration, and commissioning), as well as capturing the key Client activities in the discipline sub-schedules.

- Lead updating the Master Project Schedule, Prepare Schedule Performance Index (SPI), Earned Value (EV), Key Performance Indicators (KPIs), S-Curve, and the resource graphs.
- Liaising with the Client PMO on time planning and risk

- Perform a schedule analysis to determine the criticality of activities and their potential impact.
- Recommend potential mitigation measures to avoid or limit schedule issues and notify on slippage affecting key project milestones.
- Monitor the performance of the Client activities in the master project schedule and provide supporting evidence in Change Requests, extensions of Time (EOT), and claims.
- Manage the timely and accurate production of monthly data for sub-suppliers' production.
- Improve the project control systems to fulfill Client and PMO project requirements.
- Created schedule guidelines and procedures and implemented Tilos.

Risk Manager Responsibilities:

- Leading and interfacing proactively with a multi-disciplinary team on risk management activities including risk identification, risk analysis, mitigation planning, tracking, and reporting for cost, schedule, and performance.
- Develop, implement, and monitor the Risk Management strategy, procedures, and processes.
- Identify project risks and mitigation actions for handling risks, including early warning signals, proactive measures, and preventive procedures, and report monthly to the client the updated risks and the mitigation actions.
- Suggest mitigation for the Risks that might impact the achievement of the Program objectives.

- **WSP**
  Qatar: April 2013 to Nov 2014
  PMO Program Planning & Risk Manager

The Public Work Authorities in Qatar (PWA) had appointed WSP as the Programme Management Consultant (PMC) to manage the delivery of the Local Roads and Drainage Programme (LRDP), which includes over 230 projects with a value exceeding US$20 billion. PWA had also appointed Atkins, AECOM, Hyder, Parsons, Khatib, and Alami as General Engineering Consultants (GEC).

Responsibilities:

- Lead the WSP planning team of 15 planners and be responsible for all aspects of project planning, reporting, and progress.
- Lead assessing the schedules provided by consultants, GECs, and contractors.
- Lead in reviewing the GEC's design & contractor's construction schedules and QA planners' assessments.
- Lead in creating program reports for Client management, the PMO, stakeholders, and the Qatari Central Planning Office.
- Final approval on baselines, revised schedules, delay reports, extension of Time (EOT), and claims.
- Initiate planning improvements, schedule guidelines, and a methodology for estimating project durations.
- Produce the scheduling KPIs, the resource reports, and the materials and equipment report.
- Enhancing reporting by creating visual monthly progress and variance reports.
- Evaluate the planner's performance; propose personnel development; and enhance Knowledge sharing.
- Develop the PMO risk strategies, objectives, & policies needed to establish the framework and procedures for risk identification and management.
- Lead the technical project management teams to perform quantitative risk assessments based on a master plan for 70 road projects for the World Cup in 2022. Identify and manage Program-escalating risks identified in projects that may have wider potential to affect the program.

- **Rambøll A/S**
  Copenhagen /Denmark and Doha /Qatar: 2012 to April 2013
  Project Control Manager

Supporting Ramboll & Client project management teams with senior planning, control, reporting, and risk management. Including creating cost and resource loaded schedules, resource / work allocation, risk analysis, and performance analysis.

Responsibilities:

- Lead the planning for the high-speed rail connection between Copenhagen and Ringsted.
- Lead in establishing and managing the project setup, scope, budget, schedule, resources, and preliminary baseline.
- Lead: updating and monitoring the schedules, resolving issues, and reporting the project status.
- Consolidating and communicating progress within the project team and stakeholders
- Review and access schedules for design, construction, and procurement.
- Reports to Ramboll & Client senior management.
- Introducing new planning tools such as Tilos, BIM, 4D, and Synchro.
- Support and guide the identification and capture of risks and changes; analyze, evaluate, and report.
- Review the project risks, the mitigation plans, the schedule contingencies, and their effect on the project budget.

- **Municipality of Copenhagen Technical and Environmental Department, Centre for Construction**
  Denmark: 2008 to 2012
  PMO Project Planning and Risk Manager

Managing the planning processes and being responsible for all aspects of project planning and progress monitoring of municipal construction projects in the fields of infrastructure (roads, bridges, parks, public recreational areas, and playgrounds)

Responsibilities:

- Create the project's budget and develop a master schedule for planning, reporting, and monitoring.
- Developing a series of standard planning and reporting templates in close cooperation with the project managers
- Reviews contractors and consultants monthly progress schedules to identify any trends, variations, risks, or concerns.
- Coordinate with senior management to ensure project objectives and timelines.
- Lead in supporting the project managers (50 end-users) with planning and reporting, ensuring uniform and accurate reporting on the projects and at portfolio level.
- Creating costs, budgets, and resource reports for the PMO, project managers, senior management, and politicians.
- Introducing Primavera as a new planning tool and project risk management.
- Introduce Programme risk management practices to cover risk identification and management for all projects.

- **Grontmij Carl Bro A/S**
  Copenhagen /Denmark: 2007 to 2008
  Project Planning Developer
  Responsibilities:
  - Developing, planning, all activities for the upgrade of the Danish waste incineration plant software renewal.
  - Coordination and communication with the project stockholders to manage the risk and issues.
  - Monitor the project costs & budget and report the project progress to the management.

- **Freelance Project Planning and development consultant**
  Copenhagen/ Denmark: 2005 to 2006
  Project Planning and development consultant

Responsibilities:

- Developing, planning, reporting, and monitoring existing projects processes.
- Coordination with the project team and stockholders to monitor the projects performance.
- Identify risks characteristics, and then analyse, evaluate & quantify risks to prioritize their effects on project objectives.
- Control risks by developing & implementing a mitigation strategy and monitor the mitigations.

- **Danish National Environmental Research Institute**
  Roskilde / Denmark: 2002 to 2004
  Project Planning and development consultant

Responsibilities:

- Planning all activities, monitor and manage the establishment of the software used for monitoring the municipal air quality due to animal increase. By collecting the needed data from project managers, researcher, authorities, and other involved stockholders.

- **AEC Frederiksberg**
  Copenhagen / Denmark: 2000 to 2001
  Project Planning Engineer

Responsibilities:

- Planning, managing, and executing the plants manufacturing.
- Technical designer and Sales Manager, the Middle East was the main market area.

- **Postgraduate Studies - Copenhagen / Denmark: 1996 to 1999**

- Courses in Project management: 1996 – 1997 & M.Sc. in Civil Engineering: 1997 – 1999

- **Al Safar Construction Company**
  Mosul / Iraq: 1986 to 1995
  Planning Resident Engineer

Responsibilities:

- Develop, update, monitor and progress report the schedules for infrastructure and housing projects.
- Support the technical teams optimising their resources to improve their productivity and in ensuring construction continuity by resolving day to day issues in relation to work allocation.
- Interfacing with design team and clients to ensure compliance with the design document, quality of work, schedule, and costs management to meet the consultant's requirements.

Languages:

- Danish Professional working proficiency

Summary of major projects:

Tourist Projects: Feb 2020 – Sep 2022
US$ 4 to 5 billion, tourist projects in west of Saudi Arabia consisting of serval high rise hotels, amusement parks & their infrastructure including roads drainage and tunnels.

Femern Tunnel: Feb 2020 – Sep 2022
Femern A/S is tasked with designing and planning of a fixed link between Denmark and Germany across the Fehmarnbelt. 18 KM long immersed tunnel and the world's longest of its type for both road and high-speed rail.

The Fjernbane Infrastructure West project, 2014 - 2020
The programme encompasses deployment of a European Rail Traffic Management System (ETCS) Level 2, interlocking and rail field elements across 1,200km of track and 140 railway stations. The scope includes the full design, manufacture, supply, and installation of all infrastructure signalling systems including train detection, point machines, interlocking, radio block centre, cabling, technical object buildings, marker boards and traffic management, as well as 25 years maintenance.

Local Roads and Drainage, Parsons Brinckerhoff, Doha, Qatar, 2013-2014
Parsons Brinckerhoff has been appointed the programme management consultant for the construction of more than 200 local roads and drainage projects in Qatar the cost exceeds US$ 20 billion. The Local Roads and Drainage Program (LRDP) is part of a strategy to develop roads, drainage, bridges, and infrastructure networks throughout the country.

Ras Laffan, Qatar Petroleum, Qatar, 2012-2013
Qatar Petroleum, prepare output for the weekly and monthly progress reports and development of the EDR planning tool.

Doha Metro Green and Red Lines Tilos Support, Qatar, 2012 -2012
Assist a contractor in tender submission for the metro lines and stations. Prepare schedules in Primavera, then in compilation of constructions schedules into time-location planning software (Tilos)

UCW Copenhagen-Ringsted, Design Phase 2B, Rail Net Denmark, Denmark, 2011-2012
The work includes technical consultancy in connection to tender design and supervision on a 3.5 km long high-speed rail from Copenhagen to Ringsted. The project includes bridges construction.

Glostrup Hospital, Denmark, 2012-2013
The project is a renewal of the entire hospital and adds new buildings.

The Municipality of Copenhagen construction projects, Copenhagen, Denmark, 2008-2012
The municipal construction projects are in the fields of infrastructure/roads, bridges, parks, public recreational areas, playgrounds, etc.
There are annually around 200 projects, including the major projects listed below:

- Nordhavnsvej is largest infrastructure project in Copenhagen in decades. It is 1.7 km long and consists of: (east and west- facing interchange, 800 m long open stretch of road and 900 m long concrete tunnel).
- Aligning with the Danish Rail renewal of Norport Station on redesigning to create larger urban space.
- Aligning with Copenhagen Cityringen Metro, the project is a circular line in the city center and consists of two 17.4 km tunnels and 17 stations.
- Aligning with the Municipal Solid Waste Incineration plant.

Danish National Environmental Research Institute, Denmark, 2002-2004
Development of Software for monitoring air pollution. Assist in planning all software establishment activities.

Projects in Iraq, Mosul / Iraq, 1986-1995
Managing several commercial, residence buildings, infrastructure/roads, pipelines, and underground construction.
