PROFILE

Design Manager and Registered Architect with over 8 years' experience delivering large-scale developments across both the UK and Australia. My ability to identify and communicate value drivers to a variety of stakeholders has been strengthened by practical experience and a commitment to learning. I have a sustained interest in the relationship between ´Design Value´ and market pricing from an investment perspective.

KEY SKILLS

Real Estate Development | Architect | Value management | Mixed-use/ Residential & Commercial Design | Construction | Research

IT: Microsoft Office | Adobe Suite | CAD (Revit/ Archicad/ Microstation & Rhino)

WORK EXPERIENCE

Design Manager | Lendlease **Nov 2022 to present**

Lendlease enabled me to broaden my understanding of the development industry as a multi-national construction and real estate business. The role requires a diverse array of responsibilities.

Operational tasks and achievements include:

- Monitoring Regulatory Change: Engagement with sales and cost teams to interrogate the viability of various design options following significant change to fire stairs.

  I delivered high-level cost impact analysis that enabled executive leadership to monitor risk in a period of uncertainty.
- Procurement: I developed and implemented design documents which offered greater alignment with CAs. I obtained internal endorsement from key stakeholders following ongoing consultation with specialists and manufacturers.

  I delivered dynamic specifications which enabled project teams to manage change.
- Capacity studies: I rapidly tested massing options across the UK pipeline to support project teams on a continued basis.

  This analysis enhanced project teams' ability to identify key opportunities and constraints.

Strategic tasks and achievements include:

- R&D: I constructed an innovative database approach to competitor analysis and benchmarking. The tool is designed to support a variety of end-users at both the portfolio and project level. The process requires ongoing input from stakeholders.

  I presented an investment initiative to executive leadership, which resulted in the development of a minimum viable product.

Architect | Lifschutz Davidson Sandilands **Jan 2019 to Jan 2022**

LDS, a multi-disciplinary studio, provided the opportunity to work on large-scale commercial and residential developments across Central London.

Key projects, associated responsibilities and achievements included:

Multi-residential new-builds such as 'White Chapel' (c. 685 new dwellings, 31,000 sqm site)

- Design Development: I generated apartment configurations and envelope studies presented across numerous DTMs throughout the pre-planning phase

- Documentation: I produced an essential pre-planning submission report for the local planning authority

Reconfiguration/ retrofit & alterations to significant heritage buildings, for commercial use, including, 'New Zealand House' (55 million, 1,700 sqm site) and 'Eldon House' (5.87 million , 750 sqm site)

- Feasibilities: I executed studies that enabled the client to determine whether significant additions would enhance project viability. Additionally, I investigated alternative functional use cases.
- Documentation: I assembled critical documents such as DAS and Pre-planning reports
- Design details: I progressed facade details for the purpose of tender following specialist consultation.

My involvement resulted in successful planning applications from relevant authorities. During this period, I also completed a MSc in Real Estate at Cambridge.

Architect | fjcstudio (formerly FJMT) **2016 to Mar 2019**

Fjcstudio is an internationally renowned, multi-disciplinary studio, which provided the opportunity to act as both architect and project lead.

Working closely with a Director and Senior Associate, I managed and documented a large mixed-use development named 'Parliament House'. This entailed extensive alterations and additions to significant heritage fabric, which included a luxury hotel, offices, retail and public domain.

Key tasks and achievements included:

- Delivery across all design stages: I was actively involved in schematic design, tender and construction phases.
- Feasibilities/ value management: I conducted extensive studies across multiple project phases to ensure continued alignment between the brief and budget.
- RFI's: I processed ongoing requests from contractors in an efficient manner.

Following completion in 2018, the scheme has received multiple awards from the Australian Institute of Architects (AIA). During this time, I successfully qualified as a professional Architect.

Graduate Architect | Fox Johnston (Studio Johnston) **Jan 2015 to Jan 2016**

Upon completing my architecture studies, I worked as a graduate architect within a Sydney-based practice that specialises in architecture and interiors. I was charged with a variety of responsibilities such as competitions, single dwellings and multi-residential developments, working across all stages of design, including schematic, planning, tender and construction.
