Art Centre Workshop
Managed construction of this small but complex project including initial excavation, temporary works, construction, and plant installation. Duties included:

- Ensuring that all quality control, environmental and health and safety requirements are met
- Coordination of all on site trades
- Surveying building set out
- Monitoring and updating the project construction programme.
- Ordering materials, plant and equipment required on site
- Evaluation of sub contractor safety documentation
- Liaising with clients/consultants to report progress
- Interpret building plans, regulations and codes of practice in order to direct the progress of work and monitor compliance with construction documents
- Chairing toolbox talks and weekly project review meetings
- Raising any design queries with the relevant consultants

Fletcher EQR **June 2013-Feb 2015**
Christchurch
Contract Supervisor

Worked on the Fletcher Earthquake Recovery (EQR) project after the 2010/2011 Canterbury Earthquake sequence. The overall purpose of my role was to ensure the earthquake repair work is accurately scoped and quality repairs are undertaken in a safe, professional and efficient manner in accordance with the relevant standards. The tasks I carried out on a daily basis are summarised below:

- Providing building inspections and supervision support for the EQR project
- Maintaining a positive relationship with the customer; taking a proactive approach to dealing with queries, responding to complaints and assisting in the review and resolution of issues and concerns
- Determining what additional engineering, customer services and consultants are required for each property
- Ensuring that activity status updates are recorded daily for each property
- Reviewing, evaluating and accepting contractor site specific safety plans and task analysis before a works order is issued
- Assisting in the investigation of incidents and accidents in conjunction with the health and safety manager
- Ensuring all health and safety incidents (including near misses) are reported and recorded in a risk management program
- Monitoring and managing contractors' work practices by undertaking site audits
- Performing Monitoring inspections to ensure contractors' work is progressing safely and on schedule to meet previously agreed targets. Also ensuring that the contractors are working in accordance with the approved repair strategies to the appropriate quality standards.
- Ensuring contractor's follow policy and procedure regarding customer interaction and service
- Attending scope meetings to determine the approved scope of works for each property
- Initiating and attending all site commencement meetings and agreeing start dates with homeowners and contractors
- Verifying and managing variations in accordance with current policy
- Attending every completion inspection to ensure work has been completed in accordance with the approved scope of works
