- Town Planning
- Temporary Works

Stepnell, East Midlands January 2024 to Present

Senior Design Manager – Forest School, Coalville. Value £11M

Project Description

The scheme comprises the construction of a new 2 form (420 place) Entry primary school, constructed of timber frame, 6No pavilions in total across the site including Admin Pavilion, Main Kitchen and 4No teaching pavilions and plaza area including school playing fields, multi-use games area (MUGA), car parking and associated infrastructure.

My Role

I arrived on the project as the 4th Design Manager assigned to the project, noting the role had been vacant for some 2 months prior to my appointment, I set about reviewing all if the contract information to ensure the design were in line with the Contractors Proposals, and Employers Requirements.

Key Duties include.

- Establish a plan of attack to keep Design Management related matters under control.
- Finalisation of design team appointments to include Fire Consultant.
- Driving the design development of all internal & external work packages
- Co-ordinate external contractors with the Design team.
- Develop and finalise scopes of work for key work packages.
- Effectively manage and co-ordinate sub-contractors works packages and design information flow (utilising Viewpoint a CDE platform)

Contributing to various reports

- Monthly Client Contractor Meetings
- Monthly Project Review Meetings

Attendance at various meetings

- Design Team
- Site Team
- Subcontractor design development workshops

Maintenance of various schedules

- Procurement
- Information Required
- Design Review Requests
- Building Control Conditions
- Planning Conditions
- DTM actions
- Lessons Learnt

GMI, East Midlands — July 2022 to December 2023

Senior Design Manager – Bottling Plant, Derby — Value £33M

Project Description

The works comprise the construction of a new bottling factory over a footprint area of approximately 16,200m2 and constructing the base slab for the automated Clad Rack warehouse of approximately 6,200m2, the latter being constructed by a Client Direct Contractor.

All associated external works including Registration / Security Hut and Driver's Rest Facilities, Weighbridge, Landscaping and Reptile Receptor Area etc. and waste area as well as parking areas, roads, fences, retention pond and services are included in the scope.

Four 200m deep boreholes have been installed at the perimeter of the site by a Client Direct Contractor to provide the water to the bottling plant.

There is also 278 works which mainly comprise some works to the roundabout / bell mouths and forming a new 1.8m wide footpath, approx. 350m long with new street lighting. Section 106 Works are required to be carried and located approximately 1 Km from the site.

My Role

I arrived on the project initially for 4 weeks holiday cover and ended up stopping to PC some 66 weeks later! Quickly establishing a team of Design Management resources to turn the project around.

Key Duties include.

- Establish a plan of attack to keep Design Management related matters under control.
- Driving the design development of all internal & external work packages to recover programme and meet Employers Requirements.
- Co-ordinate external contractors with the Design team.
- Develop and finalise scopes of work for key work packages.
- Effectively manage and co-ordinate sub-contractors works packages and design information flow (utilising Viewpoint a CDE platform)
- Responsible for contract administration for the contractor's design portion packages
- Incorporate approx. 200No Client Design Variations into the scheme.

Contributing to various reports

- Monthly Client Contractor Meetings
- Monthly Project Review Meetings

Attendance at various meetings

- Design Team
- Site Team
- Subcontractor design development workshops

Maintenance of various schedules

- Procurement / Information Required
- Design Review Requests
- Building Control Conditions
- Planning Conditions
- DTM actions
- Client Sample Approval
- Risk & Opportunity

Morgan Sindall October 2020 to July 2022

Senior Design Manager – University of Salford, Science, Engineering & Environment Building Value £50M

- Driving the design development of all internal & external work packages to achieve the management programme.
- Manage the development of all design elements associated with the internal and external works
- Ensure design and build procedures are followed.
- Co-ordinate external contractors with the Design team
- Develop and finalise scopes of work for key work packages
- Effectively manage and co-ordinate sub-contractors works packages and design information flow
- Liaise with the statutory authorities and other agencies affected by the design as required
- Responsible for contract administration for the contractor's design portion packages
- Assist the commercial team with subcontract issues and any divergence from the tendered bid

Contributing to various reports (DM Sections only)

- Monthly Client Contractor Meetings
- Monthly Project Review Meetings
- Weekly Site Reports

Attendance at various meetings (Chair and take minutes where required)

- Design Team
- BREEAM
- E-docs
- BIM
- Site Team
- Subcontractor design development workshops
- Subcontractor Technical Reviews (Post Tender interviews)

Maintenance of various schedules

- Procurement / Information Required
- Reviewable Design Deliverables
- Building Control Conditions
- Planning Conditions
- DTM actions
- Sample
- BIM
- Early Warning notices (EWNs) Project Manager Instructions (PMIs) Ambiguities
- Risk & Opportunity

Continuous improvement

- Contribute to 2 separate internal steering groups with a view to developing business improvement

Sir Robert McAlpine, Manchester Office July 2019 to October 2020

Senior Design Manager within the bid team involved with numerous bids

Key Duties include.

- Manage the design process
- Promote integration of all disciplines
- Manage and appoint consultants to ensure performance in line with their deed and agreed scope of services.
- Overview, monitor and report on design programmes
- Provide technical support to the bid process, ensuring that each work package is reviewed by internal subject matter experts as part of the governance process.
- Develop designs that utilise innovative techniques.
- Work Package Reviews for Risk & Opportunities

Gallery Gardens, New Build - 366 Apartments £65M, October 2019 to March 2020

The proposed works comprise of the construction of 366 no apartments across two buildings with a gross internal area of 28,216m2 this includes circa 900m2 of basement car parking (to Block A) and 217m2 of shell only commercial space (to block B); public realm and landscaping; access and servicing arrangements and a new access road (Spinners Way), bisecting the two residential blocks.

Transition – New Build - 399 Apartments, £103M, September 2019 to October 2019

The proposed works comprise the design and construction of 399 private residential units including duplex penthouses and town houses, 50 retirement suites, commercial floor space, a full site basement with car parking and plant, new public realm and landscaping.

The development consists of three number residential towers, the buildings stand at 32, 26 and 18 storeys, each served by 2 lifts, which share a single-storey basement car park. The basement is served by four stairs, three of which share the footprint of the towers above. The lifts serving the residential cores are continued into the basement which will open into a lobby. The car park consists of plant areas, bike stores, bin stores and parking for 98 cars, except for the bin store the car park is un-sprinklered.
