Personal Statement

I am an experienced and driven Quantity Surveyor currently working on behalf of main contractor Seddon Construction, looking to apply my skills in a new role. I have a robust knowledge base of the commercial and contractual elements of construction projects, and have considerable experience working collaboratively with clients, colleagues, and supply chains to deliver profitable, punctual, high-quality projects. My work experience includes the commercial management of a variety of residential new build, retrofit and refurbishment projects ranging between £1m - £21m, under both traditional and design and build contracts.

Work Experience

Seddon Construction

Jan 2023 – Current **Quantity Surveyor**

- Forecasting cost and value positions accurately, ensuring that financial positions are maximised without compromising relationships with clients and subcontractors.
- Producing and presenting cost value reconciliation reports to advise management on any movements in project profitability.
- Advising management on action plans to minimise financial risks and maximise opportunities at project level.
- Preparing and negotiating interim valuations and final accounts with clients, and providing regular cash flow forecasts as required.
- Quantifying and costing variations to issue to clients, making sure that all labour, plant, material and preliminary costs are accounted for.
- Attending regular contract review meetings with clients to maintain strong working relationships.
- Monitoring receipt of payments to ensure that funds are received in accordance with the agreed contract timescales.
- Executing key contract administration processes under various forms of contract such as the production of contractual notices, and the submission of additional time and money claims.
- Leading the subcontractor procurement process including the preparation of tender documentation, sending out enquiries to the supply chain, analysing tenders, negotiating favourable contract sums and inclusions, and preparing subcontract orders.
- Liaising with the project team to ensure appropriate subcontractor selection, making sure that considerable attention is paid to inclusions, skill and experience, labour capacity, and health and safety.
- Chairing pre-contract meetings with supply chain representatives to help develop positive relationships and ensure the full understanding of contractual requirements prior to placing subcontract orders.
- Assessing subcontractor interim and final account applications and negotiating favourable outcomes.
- Preparing and issuing payment notices, pay less notices and payments in a timely manner as set out in the contract.
- Working with Buyers to assist with the procurement of materials, ensuring that costs are kept in line with budgets.
- Studying main contract documentation at pre-construction stage to advise on any onerous conditions prior to formal contract formation.
- Developing and maintaining strong professional relationships with clients and the supply chain to maximise future business opportunities.
- Liaising with Estimators to identify risks and opportunities to assist with tender submissions for future projects.
- Supporting the training and development of Trainee and Assistant Quantity Surveyors.

Sep 2018 – Jan 2023 **Trainee/Assistant Quantity Surveyor**

- Accurately forecasting costs for subcontractors, fees, materials, and preliminaries to assist the Senior Quantity Surveyor in preparing cost value reconciliation reports.
- Monitoring preliminary costs and advising the Senior Quantity Surveyor on actions to remedy any over-expenditure to bring costs back in line with budgets.
- Measuring progress of works on site and producing interim valuations and final accounts to issue to clients.
- Producing cash flow forecasts to assist with financial decision-making processes internally and externally.
- Taking-off quantities from design team drawings to assist in the production of bills of quantities to include in subcontract orders and tender documentation.
- Procurement of subcontractors by sending out enquiries to the supply chain, reviewing tenders, negotiating prices, and providing recommendations to the Senior Quantity Surveyor on the most appropriate subcontractor for each work package based on cost, quality, and time.
- Compiling subcontract orders, ensuring that all required documentation is included to safeguard the company's position.
- Producing payment notices and pay less notices in accordance with the timescales set out in the contract.
- Drafting contractual letters to assist in the preparation of time and money claims under various forms of contract.
- Processing payments to the supply chain using the internal financial data management software.
- Assessing subcontractor interim and final account applications by completing measures on site and communicating with project teams to gain a full understanding of site progress and any issues.
- Liaising with internal and external stakeholders to develop positive working relationships.

Qualifications

RICS

- RICS Student member currently in the process of collating CPD record, summary of experience and case study elements through the online assessment platform.
- Aiming to submit for the final assessment interview and gain RICS Chartered status within the next 12 months.

University of Salford

2019 – 2021 **BSc (Hons) Quantity Surveying – First Class (1st)**
