Professional Summary

I am an experienced Document Controller/Information Manager with two years in the UK commercial construction sector, focusing on project documentation, compliance, and security management. I am skilled in managing fast-paced environments with a strong attention to detail, specialising in secure document control processes. I also have over 15 years of experience in property development, providing me with a deep understanding of project timelines and client expectations. Adept at collaboration and communication, I consistently meet project goals efficiently and accurately.

Professional Experience

Document Controller / Information Manager

ISG Ltd, London, UK - September 2022 – Present

Current Project: HMP Grendon Springhill Prison Extension, Buckinghamshire (£300M)

- Manage secure documentation using Viewpoint for a £300M Ministry of Justice project, ensuring strict version control and access protocols.
- Achieved BPSS clearance, handling sensitive data for internal and external team members.
- Administered security checks (BPSS, DHR) and NDAs for staff, subcontractors, and consultants.
- Managed daily document control tasks including uploads, tender package creation, RFI management, and regular audits to ensure compliance with project standards.
- Liaise with HR and external security agencies to manage personnel security clearances.

Previous Project: BIW South Apron Extension, Jaguar Land Rover EV Facility, Speke (£50M)

September 2022 – April 2023

- Managed documentation for the £50M project using Aconex, ensuring real-time document distribution and compliance with industry standards.
- Coordinated between design, construction, and client teams to ensure seamless documentation flow.

Agratas Gigaplant Battery Manufacturing Facility, Gravity Park, Bridgwater, Somerset

Pre-Tender Phase – March/April 2024

- Reviewed the BIM Execution Plan (BEP) and set up Aconex to align with project requirements, ensuring compliance with ISO9001 & ISO19650 standards.
- Developed and implemented a comprehensive Information Management Protocol, establishing document control workflows and naming conventions.
- Configured SharePoint for seamless integration with Aconex, enabling efficient document sharing and collaboration among stakeholders.
- Coordinated with the pre-tender team to establish a structured document management system tailored to project needs.

Additional Project: Borealis Multi-Platform Biotech Manufacturing Facility, Fujifilm (£250M)

December 2022 – Present

- Utilised Aconex and SharePoint to manage and distribute M&E documentation, collaborating with quality teams for compliance and timely project delivery.
- Conducted audits of M&E documents to ensure accuracy, compliance, and version control.
- Supported daily document management activities, including uploading technical specifications, and managing RFIs.

Director
