Nicola Giannotta

Section Engineer
Stockport, Inghilterra, Regno Unito

Esperienza

BAM UK & Ireland

Section Engineer
settembre 2023 - Present (8 mesi)
Huddersfield, England, United Kingdom

The Transpennine Route Upgrade is a major investment being made in the railway between York and Manchester via Leeds and Huddersfield12. The line is heavily used but is slow and lacks capacity12. The upgrade was first announced in 2011 and a modified £2.9bn scheme was confirmed in 20193. The improvements include electrification and a doubling of the number of tracks on the most congested sections around Leeds and Huddersfield, allowing faster trains to overtake slower ones345. The upgrade will improve connectivity in the North, support economic growth, and deliver real benefits for passengers and communities along this pivotal rail artery2. The Transpennine Route Upgrade is part of the Northern Powerhouse Rail5.

Laing O'Rourke

5 anni 6 mesi

Section Engineer
giugno 2019 - settembre 2023 (4 anni 4 mesi)
Manchester, United Kingdom

I’m Section Engineer for Laing o Rourke at THE FACTORY project.
The project consists of a very complicated steel frame structure combined with RC frame and precast elements which will host the new theatre/ arena / show room for the city of Manchester .
The project is also surrounded by listed buildings which involves monitoring procedures.
The project value is over 150 millions pounds.
