SALESFORCE ARCHITECT & SENIOR DEVELOPER | 21X CERTIFIED

City: The Hague, Netherlands

Email: onesteptech.prateek@gmail.com

Telephone: +31 6 50 08 38 60

LinkedIn: Prateek Bharadwaj

Professional Profile

With over 11 years of experience in software and Salesforce development and architecture, I bring structure to complexity. Certified across 20+ technical domains, including Salesforce, Copado, Java, Oracle, and APTTUS, I design scalable systems with clarity and precision. What drives me is the satisfaction of transforming business needs into solutions that work smoothly and predictably. Currently expanding expertise in AI/LLM frameworks (n8n, LangChain, agentic workflows).

Known for setting high standards, I've introduced working practices that brought consistency to teams and coached starting developers into confident contributors. Clear communication, clean architecture, and reliable delivery timelines are non-negotiables in every engagement. Whether leading a deployment or diving deep into integration challenges, I stay fully accountable for results, because ownership isn't just a mindset, it's how I work.

Work Experience

Salesforce Architect & Senior Developer | 08/2025 – currently working
Wunderbricks, Amsterdam

- Built a no-code solution to automate daily reminder emails with PDFs, cutting development effort by 50% and doubling reminder efficiency.
- Architected a case collaboration framework that increased agent productivity by 30%, accelerated case resolution by 25%, and reduced email handling time by 60%.
- Designed a secure external-user access model using Salesforce Communities with full authentication and no additional licenses, significantly enhancing customer experience.
- Optimized a multi-level object cloning script, improving performance by many folds.
- Collaborating with external vendors and internal stakeholders to align technical solutions with strategic business needs.
- Developed a scalable sharing model for a multi-tenant Salesforce org.
- Converted complex PDFButler templates into VF templates to help the Client in streamlining the number of tools they use.
- Currently exploring the abilities of n8n automations and Agentforce.

Senior Salesforce Developer | 05/2021 – 06/2025
LeasePlan, Amsterdam

- Delivered and maintained a high-impact renewal application used across six European countries, streamlining operations, improving operational efficiency and user adoption by many folds.
- Acted as Salesforce SME by designing and implementing scalable Salesforce solutions aligned with business goals.
- Facilitated agile ceremonies (refinements, stand-ups, demos), ensuring alignment between technical teams and stakeholders.
- Translated stakeholder requirements into prioritized, actionable user stories to support sprint planning and timely delivery.
- Integrated Salesforce with external platforms via REST APIs, enabling seamless data exchange and automation.
- Reduced delivery lead times by producing detailed design documents for new development initiatives by 40%.
- Mentored junior developers through code reviews, documentation standards, and technical coaching, fostering team quality and growth.
- Managed backend configuration, system automation, and data integrity across several business units.
- Resolved user issues and supported end users, contributing to smoother operations and stronger adoption.
- Resolved critical production issues within SLA timelines, ensuring uninterrupted system performance.
- Delivered proof-of-concept solutions to streamline internal workflows and assess technical feasibility.
- Contributed to data migration projects using Azure Data Factory, Databricks, SQL, and Python, ensuring data consistency and accuracy across systems.
- Optimized application performance and ensured system reliability through testing, monitoring, and proactive issue resolution.

- Contributed to integration design and event-driven workflows, ensuring scalable, resilient system communication across enterprise platforms.

Salesforce Developer and Administrator | 03/2019 – 04/2021
Deloitte Nederland, Amsterdam

- Delivered scalable Salesforce solutions for clients including PostNL, Shell, and The Ocean Cleanup, improving system usability and user engagement.
- Built reusable, metadata-driven Lightning components, reducing development effort across multiple modules by 40%.
- Applied standardized coding frameworks to ensure maintainability, reduce tech debt, and support code reuse.
- Streamlined team development workflows by managing source control and branching strategies via Git.
- Implemented dynamic dashboard filtering, enhancing reporting flexibility for business users.
- Leveraged native Salesforce features (Flows, Sites, Permissions) to accelerate delivery and minimize custom code.
- Configured Salesforce Sites to efficiently capture user input and support front-end interaction.
- Integrated SharePoint with Salesforce, enabling seamless document management and improving collaboration.
- Supported data governance and GDPR compliance through secure Salesforce configurations.
- Participated in Scrum ceremonies and agile delivery, ensuring timely sprint execution and cross-team collaboration.

Salesforce Developer and Administrator | 11/2018 – 02/2019
EY Global Consulting Services, Bangalore

- Built Salesforce proof-of-concept to test new solutions, influencing key implementation decisions.
- Identified bottlenecks in existing Salesforce implementations and delivered targeted enhancements for better scalability.

Salesforce Developer and Administrator | 06/2016 – 11/2018
Deloitte India (Offices of the U.S.), Bangalore

- Delivered Salesforce solutions for U.S.-based clients including Clarivate Analytics, Abbott, and Microfocus.
- Led end-to-end implementation of Salesforce CPQ, improving quoting accuracy and sales efficiency by 10 times.
- Designed scalable Conga CPQ, CLM and X-Author architecture for enterprise healthcare clients.
- Built custom features using Apex triggers, Visualforce, layouts, and sharing models to meet complex requirements.
- Developed test classes and managed automated deployments via ANT, reducing release overhead by 50%.
- Scheduled and optimized Apex batch jobs, ensuring high-volume data processing.
- Acted as key liaison between onshore delivery teams and client stakeholders to align expectations and delivery.

Java and QA Automation Engineer | 09/2014 – 05/2016
Tata Consultancy Services, Chennai

- Contributed to in-house projects and U.S. clients, including Staples, by resolving UI–backend data integrity issues.
- Improved software quality by automating UI and DB testing using Selenium and custom frameworks.
- Built a unified test automation framework, reducing regression cycle time by 30%.
- Delivered a MongoDB health check tool praised by clients for accelerating data validation and improving accuracy by 5 times.
- Identified critical DB issues during functional testing, enhancing app stability and release confidence.

Certifications

Salesforce certified: Agentforce Specialist; AI Associate; Platform Developer II; System Architect; Application Architect; CPQ Specialist; Sales Cloud Consultant; Integration Architect; Data Architect; Platform App Builder; Sharing and Visibility Architect; Administrator; Platform Developer I.

Oracle certified: Java SE6 Programmer Professional; Oracle Database SQL Expert.

ISTQB certified: Tester Foundation Level.

APTTUS certified: Quote-to-Cash.

Copado certified: Fundamentals I; Fundamentals II.

Skills

Programming & Scripting: Apex, SOQL, SOSL, Java, Python (Beginner), SQL, JavaScript, HTML, CSS, ASP.Net, REST APIs, MongoDB, LangChain(learner).

Salesforce Platform: Lightning Components, LWC, Platform events, Aura, Salesforce CPQ, Flows, Process Builder, Triggers, Validation Rules, Visualforce, Validation Rules, Sharing Settings, Security Model, Custom Metadata, Reports, Dashboards, REST APIs, Salesforce Architecture, App Builder, Permission Sets, Profiles, Page Layouts, Sales Cloud, Conga CPQ, Conga CLM, Conga X-Author, Agentforce, Einstein Copilot, Prompt Builder, Agents Design, Generative AI.

DevOps & Tools: Git, GitHub, GitLab, Bitbucket, Copado, ANT Migration Tool, IntelliJ, Visual Studio, Postman, Data Loader, Stoplight Studio, Azure Data Factory, Databricks, PyCharm, Selenium, FFLIB, Prompt Engineerng, Generative AI.

Methodologies: SCRUM, Kanban, Object-Oriented Design (OOD), Agile, Object-Oriented Programming (OOP), Scrum, Pair Programming, Test-Driven Development.

Domain: Leasing(LeasePlan), Healthcare(Abbott), Logistics(PostNL), Consulting(TCS, Deloitte, EY), Retail(Staples), Analytics(Clarivate Analytics), NPOs(The Ocean Cleanup), Human Resources(Shell)

Education

Bachelor of Technology (Computer Science & Engineering)
Uttar Pradesh Technical University, India
08/2010 – 07/2014

- Covered core computer science topics including data structures, algorithms, OOP, and operating systems.
- Gained proficiency in Java and C++.
- Built web applications using HTML, CSS, and JavaScript.
- Worked with both relational and NoSQL databases (SQL, MongoDB).
- Completed academic and personal software development projects.
- Gained proficiency in tools such as Git, GitHub, and Jira.

Languages

English – C2 (Fluent)
Dutch/Nederlands – A2 (Basic, studying for B1)

VISA

Not required to work in the EU.
