PROFILE

A committed, approachable, and reliable team player with proven experience in planning and delivering complex projects and implementations. Adopts a hands-on approach to engage and influence stakeholders at all levels. Skilled in stakeholder management, Agile delivery, communication, and global system integration. An inquisitive problem solver, known for delivering value-driven solutions, driving user adoption, and demonstrating leadership, integrity, and accountability.

WORK EXPERIENCE

Webfleet Solutions (Bridgestone), Amsterdam | 2022 - Present

Senior Product Owner - Salesforce

Core Responsibilities

Strategic Leadership & Service Delivery

- Defined, developed, and communicated the Salesforce product vision and roadmap, aligning with business strategy, innovation, and revenue management objectives.
- Worked closely with the revenue management team and stakeholders to identify requirements and translate them into actionable product deliverables.
- Led cross-functional Salesforce programmes across Sales, Service, and Marketing Cloud for over 1,100 users.
- Owned project intake, prioritisation, and approval processes to ensure value-driven delivery, revenue optimisation, and business growth.
- Managed supplier relationships and ensured platform scalability, performance, and compliance.
- Conducted gap analysis and produced management reports to support strategic decision-making.

Governance & Optimisation

- Designed global Salesforce role, profile, and hierarchy structures.
- Implemented JIRA-based intake and governance processes to streamline workflows and align with strategy and timelines.
- Supported change management, end-user training, and governance frameworks to improve adoption.
- Ensured compliance, consistency, and ongoing optimisation of delivery processes.

Stakeholder Engagement & Communication

- Facilitated leadership meetings and issued regular Salesforce communications.
- Defined user stories, acceptance criteria, and prioritised features, ensuring clarity and alignment with development teams.
- Acted as a trusted adviser to senior executives, driving adoption, capability maturity, and strategic alignment.
- Collected and incorporated stakeholder feedback to inform product decisions, enhancing accuracy, competitiveness, and responsiveness.

Product Ownership & Innovation

- Owned, created, and prioritised the Salesforce product backlog, ensuring development delivered the highest value in terms of growth and revenue optimisation.
- Provided ongoing clarification and guidance to development teams, particularly around product algorithms and data integration.
- Reviewed completed work to ensure alignment with acceptance criteria, product strategy, and quality standards.
- Measured and reported on product performance, including KPIs relating to effectiveness and progress towards revenue management objectives.
- Supported innovation initiatives, new tools, and cross-functional programmes, including international roll-outs and regional customisation.

Project Leadership & Delivery

- Supported IT and business alignment during requirements gathering, planning, and delivery phases.
- Ensured timely delivery by evaluating outputs against acceptance criteria and closing projects with IT and management.
- Resolved conflicts and removed obstacles to enable on-time delivery of features and improvements.

Stakeholder & Supplier Relationship Management

- Acted as the main point of contact between external consultants, business, and IT for Salesforce-related matters.
- Managed third-party supplier relationships and facilitated clear, strategic communication.
- Provided stakeholder feedback loops and supported decision-making across teams.

HOBBIES

- Rugby Coach at Haagse Rugby Club
- Mountain biking and camping being outdoors
- Spending time with my twin boys
- Sailing
- Was an active member of NSRI for 17 Years in South Africa

Key Achievements

- **Lead Global Role & Security Redesign:** Redesigned the global Salesforce roles and hierarchy profiles, simplifying **40 roles into 15**. Improved user access, permissions, and security across regions.
- **Cost-Reducing intake process:** Introduced a new simplified ticketing and project intake process, reducing internal Salesforce support time and costs by **60%**. Freed up resources for better planning, transparency, and cost efficiency.
- **Training & Enablement program**: Launched a scalable training initiative for new and experienced users, enhancing platform adoption, on-boarding speed, and self-sufficiency.
- **Legacy replacement introducing core Salesforce products:** Successfully implemented core Salesforce products across Webfleet and Bridgestone, replacing fragmented legacy systems and reducing integration issues. Helped streamline reverse logistics, gaining full control over product returns and preventing **€270,000** re-admittance issues per month.
- **Executive Engagement & Strategic Alignment:** Engaged global senior management in strategic Salesforce planning, increasing awareness and aligning platform capabilities with business transformation goals. Improved understanding and visibility of our **€1.5 million** annual Salesforce contract.
- **Governance documentation:** Established robust Salesforce governance documentation to improve standardization, audit readiness, and platform accountability. Delivered urgently needed governance and training for approximately **700** external partners and field agent**s.**

WORK EXPERIENCE

Wereldhave Management Holding BV, The Netherlands | 2020 - 2022

Salesforce Product Owner / Scrum Master / Salesforce Admin

Core Responsibilities

Product Strategy & Roadmap

- Defined and executed the Salesforce product strategy across leasing, legal, and finance teams focusing on scalability, efficiency, and measurable ROI.
- Analysed user feedback, business needs, and technology trends to shape product vision and continuous improvement strategies.

Requirements & Delivery Ownership

- Translated business goals into clear product requirements and user stories for development and UX teams.

Agile Leadership

- Facilitated Agile ceremonies (sprint planning, backlog refinement, demos, retrospectives) and ensured consistent delivery across cross-functional teams.

Process Optimization and Customer Experience Design

- Advocated for customer-first product development using data insights, design thinking, and iterative improvements.
- Led workshops to re-engineer workflows and apply Salesforce best practices to improve efficiency and data quality.

Stakeholder and Vendor Management

- Aligned executive and cross-departmental priorities through structured stakeholder engagement and impact-driven communication.
- Negotiated vendor SLAs, handled contract performance, and ensured high-quality service delivery within allocated budgets.

Platform Governance and System Integration

- Managed the full Salesforce platform life-cycle, including release management, change control, and system performance tuning.
- Oversaw technical integration with ERP, DocuSign, Conga, SharePoint, and Data Warehouse to support seamless and secure data flow.

Training & Adoption

- Delivered on-boarding and up-skilling through tailored 1:1 training, role-based enablement materials, and ongoing user support.

HENK DE LANGE

SENIOR PRODUCT OWNER

PREVIOUS WORK EXPERIENCE

- Dood Limited - UK
  - IT Field Engineer
- EMC - UK
  - Implementation & Deployment Specialist
- Bytes Technology Services - UK
  - Senior Field Engineer
- Carrera Technology - UK
  - Field Service Engineer & Team Leader

- References are available upon request

Key Achievements

- **Process transformation:** Rolled out a "**New Way of Working**" with automated, multi-level approval flows and role-specific on-boarding—drastically improving user adoption and platform engagement.
- **Third-Party integration excellence:** Successfully integrated Salesforce with external systems (ERP, Conga, DocuSign, SharePoint), creating a robust bidirectional data flow and reducing manual work through automation.
- **Governance implementation:** Established formal **change and release governance** processes, improving system reliability, platform compliance, and release transparency.
- **Central point of contact:** Salesforce communications and project ownership, reducing update-related misunderstandings by **40%**, increasing adoption of new features, and improving business collaboration on platform improvements.

WORK EXPERIENCE

SES Satellites & O3B Networks, The Hague | 2016 - 2020

Salesforce Platform Lead /Admin & CPQ Admin

Core Responsibilities

Salesforce Platform Ownership & Development

- Managed the global Salesforce CRM across diverse business units, overseeing development, configuration, implementation, and ongoing platform support.
- Acted as the primary contact for Sales Cloud, Marketing Cloud, and CPQ (Lead-to-Order) processes, serving over 600 internal and 200 external users.
- Maintained documentation, training materials, and user manuals to support on-boarding, change management, and adoption of new features.
- Delivered global training programs to ensure user enablement on new Salesforce processes.

Salesforce Administration, CPQ Architecture & Data Governance

- Led CPQ configuration for 6,000+ product items, including complex bundles, product rules, approval flows, and custom quote templates.
- Ensured data integrity through de-duplication, cleansing protocols, and robust governance.
- Developed real-time dashboards and performance reports for executive visibility and data-driven decision-making.
- Collaborated with 3rd-party contractors to ensure seamless CPQ transition and business alignment.

Project & Service Delivery Management

- Acted as the business liaison for IT project management, handling internal IT requests and ensuring successful project delivery and handover.
- Directed the data migration of three legacy CRMs into a unified Salesforce platform—standardizing processes and identifying training and operational gaps.
- Designed ticketing and project intake processes to reduce Salesforce-related support costs and improve prioritization of enhancements.

Agile Delivery & Scrum Leadership

- Operated as Scrum Master, coordinating with Product Owners, BAs, and developers to manage backlogs and deliver continuous improvements.
- Facilitated Agile ceremonies (sprint planning, reviews, retrospectives) and advanced team Agile maturity.
- Built real-time dashboards to monitor team KPIs and improve resource allocation.

Key Achievements

- **Unified three CRMs into one global Salesforce platform:** led data migration, streamlined operations, improved data integrity, and identified key training and process gaps.
- **Implemented Salesforce CPQ for 6,000+ products:** delivered a complex solution with dynamic bundles, pricing rules, and approval flows.
- **Drove global Salesforce adoption and training:** designed scalable documentation, support, and training programmes for 600+ internal and **200** external users across multicultural teams.
- **Established strong stakeholder and change management framework:** built trust through clear communication, business analysis, and proactive change management.
- **Delivered real-time leadership dashboards and reporting:** enabled KPI tracking, resource optimisation, and data-driven decision making.
- **Maintained robust Salesforce environment with strong data governance:** improved master data quality through duplicate management, validation rules, and process optimisation.
- **Acted as key liaison with third-party partners and Salesforce:** managed updates, release communications, training sessions, and demonstrations.
