Anna Grytsai

Product Owner & Test Manager | Payments | Cards & Acquiring
Hoofddorp, North Holland, Netherlands

Summary

With over 16 years of diverse experience in IT, I worked as a Product Owner, Scrum Master, Test manager and Quality Assurance Engineer. I proactively participate in the development process from gathering requirements to final release and post-production support.

My strong analytical skills, problem-solving abilities, and a result-oriented mindset help me to create value for customers. As a dedicated team player, I enjoy working in collaborative environments and I am committed to contributing to the success of strategic projects.

I believe in the power of bringing people together and creating a strong team spirit. Ensuring that team members are involved, inspired, and aligned is a priority for me. I try to maintain a positive atmosphere where people enjoy working together.

As a Product Owner, I excel in:
- Stakeholder Collaboration: Bridging the gap between stakeholders and development teams, translating business needs into actionable user stories and requirements.
- Backlog Management: Prioritizing and refining the product backlog to ensure the delivery of high-value features, managing scope, and setting clear priorities.
- Agile Methodologies: Leading Agile ceremonies and supporting culture of continuous improvement.
- Cross-Functional Team Leadership: Coordinating across multidisciplinary teams to deliver high-quality products on time and within budget.
