A Self-Powered Bipolar Rectifierless Series-SSHI Circuit With Dual-Polarity Energy Extraction for Piezoelectric Energy Harvesting

Sreedharan Maniyil

MSc Microelectronics at TU Delft
Delft, South Holland, Netherlands

Summary

I am a recent graduate in Electrical Engineering (Microelectronics track) from TU Delft, with a solid academic foundation and practical experience, including designing innovative energy-harvesting systems for my thesis project. I am driven by an insatiable curiosity and a passion for continuous learning. With a strong interest in analog electronics, digital circuits, and power electronics, I thrive in dynamic environments that challenge me to expand my knowledge and skills. I am eager to contribute to cutting-edge projects while growing as a professional engineer

Experience

ASML
Student Intern
September 2023 - November 2023 (3 months)
Delft, South Holland, Netherlands

Worked in an interdisciplinary team of students from TU Delft to develop a physics model using a systems engineering approach in order to reliably detect and monitor lithography defects on a 300mm semiconductor wafer at the upcoming A10 node while limiting inspection time per wafer to an hour.

Tata Consultancy Services
System Engineer
October 2020 - July 2022 (1 year 10 months)
Chennai, Tamil Nadu, India

Client : Delta Airlines

• Worked as a Java Developer for Delta Airlines' application Crew360
• Contributed to projects following Agile methodology, working in two-week sprints to deliver iterative results and meet project goals efficiently.
• Collaborated with cross-functional teams in daily stand-ups, sprint planning, and retrospectives.
• Developed code for various sub-sections of the application
• Depending on the requirements of the team, worked as a QA and DevOps Engineer

• As QA Engineer, wrote Cucumber test scripts to test newly developed code before deployment and improve code coverage and returned to the development team with suggestions and improvements.
• As DevOps Engineer, was solely responsible for the team's deployment, test and reporting pipelines and code base for the team's Jenkins repository
• Wrote and maintained documentation for all kinds of work done and was responsible for knowledge transfer and training of new DevOps resources.

Education

Delft University of Technology

Master of Science - MS, Microelectronics · (September 2022 - November 2024)

Amrita Vishwa Vidyapeetham, Coimbatore

Bachelor's degree, Electrical, Electronics and Communications Engineering · (2016 - 2020)
