# Diego Martínez Machín

Junior DevSecOps Engineer | Técnico superior en desarrollo de aplicaciones multiplataforma
Zaragoza, Aragón, España

## Extracto

I'm Diego Martínez Machín, a Junior DevSecOps Engineer with a solid background in cross-platform application development and microcomputer systems and networks. My enthusiasm for technology and software engineering drives me to stay updated with the latest industry trends and tools. I consider myself a curious, persistent, and results-oriented individual who enjoys tackling complex challenges and crafting innovative solutions.

I've had the opportunity to work on various academic and personal projects, and I'm currently applying my skills as a Junior DevOps Engineer at UST Spain & Latam. Previously, I gained valuable professional experience at NTT DATA Europe & Latam and as a Student-Digital Architecture, where I built a strong foundation to tackle new challenges in the tech industry.

I strongly believe in teamwork and continuous learning. I enjoy collaborating with others, sharing ideas, and learning from my colleagues, as I am convinced that synergy is essential for the success of any project. My technical expertise includes technologies such as NestJS, Jenkins, GitHub (certified), GitHub Actions, Kubernetes, AWS (certified), Azure, Terraform (certified), and OpenShift, among others.

## Experiencia

### UST España & Latam

Junior DevSecOps Engineer
agosto de 2024 - Present (1 año 3 meses)
Zaragoza, Aragón, España

Currently, as a Junior DevSecOps Engineer at UST, I am working on a banking project for Santander. My responsibilities include managing cloud infrastructure with AWS, automating CI/CD pipelines using GitHub Actions, and orchestrating containers with Kubernetes. I also use Terraform for

Infrastructure as Code (IaC) and tools like dynatrece and Fortify to ensure security and compliance.

### NTT DATA Europe & Latam
1 año

#### Student - Digital Architecture
julio de 2024 - agosto de 2024 (2 meses)
Zaragoza, Aragón, España

In this role, I contributed to a banking sector project of Ibercaja where I applied my knowledge of technologies such as Microsoft Azure, Azure DevOps, Kubernetes, OpenShift, and Terraform. My responsibilities included designing and managing scalable and secure infrastructures, utilizing cloud platforms and Infrastructure as Code (IaC) practices.

#### Student - Digital Architecture
septiembre de 2023 - julio de 2024 (11 meses)
Zaragoza, Aragón, España

During the first three months of this experience, I received intensive training in DevOps technologies, including tools such as Jenkins and platforms like Kubernetes and OpenShift. Additionally, I was trained in various cloud platforms, which provided me with a strong foundation in cloud computing.

After the training, I joined a banking sector project of Ibercaja where I applied my knowledge using technologies like Microsoft Azure, Azure DevOps, Kubernetes, and OpenShift to design and manage scalable and secure infrastructures.

### Academia de Inventores
Empleado en prácticas
abril de 2022 - junio de 2022 (3 meses)
Zaragoza, Aragón, España

## Educación

### Centro San Valero
Grado superior en desarrollo de aplicaciones multiplataforma · (septiembre de 2022 - junio de 2024)

### Centro San Valero

Técnico de sistemas microinformáticos y redes, Informática · (septiembre de 2020 - junio de 2022)
